- 0 - 2 years of work experience, freshly graduates are welcome
- Age not over 24 years old
- Good English Proficiency
- You just have to be Young and Love Coding (with a portfolio)

30,000 THB/month minimum is your starting point for while in training and adjusts according to your skills after we see you in action.

Frontend Developer (Up to 80K)

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming and love to write elegant code. You will be responsible for transforming UI/UX designs to actual code that will produce visual elements of the application. You will work closely with UI/UX designers and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

1. Implement web applications from designs in the form of Sketch or Figma.
2. The web applications are to be implemented with fitting and reusable code. They are also expected to be optimized for speed and scalability.
3. Discuss UI/UX with the designer for appropriate and feasible resolutions.
4. Collaborate with other team members, project managers, and stakeholders.

Qualifications

1. Proficient understanding of advanced ReactJS. Experience of using Ruby on Rails, Next.js, Redux, D3.js, or WebRTC will be a considerable bonus.
2. Proficient understanding of CSS and its variants, such as SCSS, or CSS-in-JS.
3. Proficient understanding of implementing a complex web responsive design, along with cross-browser compatibility issues and ways to work around them.
4. Familiarity with design toolkits such as Sketch or Figma.
5. Proficient understanding of Git.
6. Good understanding of SEO principles and ensuring that application will adhere to them.
7. Proficient in English for both written and oral.
8. Junior and up to Senior levels are welcomed.

Ruby on Rails Developer (Up to 100K)

As a Back-end developer, you will be a part of a talented team to create our backend system that handles more than 10 million requests (and growing) per month.

Qualifications

- 2+ years in Ruby on Rails development
- 4+ years in Ruby on Rails development for a senior position
- Able to code basic HTML/CSS/JS/ReactJS to get the job done
- Experienced/Specialized in backend development with high load and high availability environment
- Knowledge in NoSQL (Cassandra, MongoDB) and PostgreSQL
- Knowledge in caching (Redis)
- Knowledge in microservices and service scalability
- Love writing test specs
- Know how to make gem (or gold)
- Very good English both oral and written
- Knowledge in SQL Cluster
- Love designing a service and fault-tolerant design
- Some knowledge in DevOps (CentOS/CoreOS/Kubernetes/Docker) experience is a plus
- Experienced in image processing and machine learning
- Knowledge of AWS (EC2, RDS, ElasticBeanstalk, ElasticSearch, ElasticCache, well everything)
- Know a concept of DNS, IPv6, network

Python Developer (Up to 100K)

Are you a highly experienced Python Developer looking for a challenging role where you can learn lots more and work on exciting projects in a great working environment?

If you are passionate about technology, constantly seeking to learn and improve your skillset, then you are the type of person we are looking for!

Responsibilities

- Write reusable, testable, and efficient code
- Design and implementation of low-latency, high-availability, and performant applications
- Integration of user-facing elements developed by front-end developers with server-side logic
- Implementation of security and data protection
- Integration of data storage solutions
- Performance tuning, improvement, balancing, usability, automation
- Work collaboratively with the design team to understand end-user requirements to provide technical solutions and for the implementation of new software features
- Work with data scientists and data engineers to deliver AI services
- Use an agile methodology to build software and platforms

Qualification

- Previous working experience as a Senior Python Developer for 4 years. For Junior Python Developer, New graduates are welcome.
- BS/MS degree in Computer Science, Engineering, or a related field.
- Hands-on experience with Django, Flask, or other Python frameworks
- Good understanding of cloud application deployment
- Good understanding of front-end technologies, such as JavaScript, HTML5, and CSS3
- Experience in front-end frameworks like ReactJS, NextJS, etc.
- Experience in database systems such as PostgreSQL, MongoDB Database
- Have experience in developing a full life-cycle product
- Good command of both written and spoken English
- Experience in Docker, containerization, and orchestration is a plus

- Basic understanding of the machine-learning model is a plus

Benefits to all position

- Group health insurance.
- You pick your equipment (Mac / Windows)
- Flexible working hour
- Work from home day !!
- Free Snacks and Drinks
- Free lunch on Friday
